

Aquifer®

Innovative Drinking
Fountains and Bottle
Filling Stations.

The fresh water flowing through our Canadian rivers was the inspiration behind our new line of drinking fountains and bottle refill stations. We have designed a durable and attractive line of hydration solutions that will enhance any park or public space in your community.

The Mackenzie

MODEL: 350000

11.5" L x 11.5" W x 42.6" H

This standard single basin water fountain features durable vandal-resistant stainless steel and beveled edges for added safety.

The Grand

MODEL: 350010

31.1" L x 11.5" W x 42.6" H

This dual function water fountain offers a second lowered basin that conforms to ADA guidelines and allows for easy accessibility for all ages and abilities.

The Niagara

MODEL: 350020

43.9" L x 11.5" W x 42.6" H

This triple basin water fountain offers the standard basin, the lowered accessible basin and a ground-level dog basin with "human height" activation controls to help keep any four-legged friend hydrated.

The Fraser

MODEL: 350030

11.5" L x 11.5" W x 62.9" H

This upright bottle filling station is an environmentally conscious addition to any outdoor space. Help reduce plastic waste in your community while encouraging your active residents to stay hydrated.

The Athabasca

MODEL: 350040

31.1" L x 11.5" W x 62.9" H

This station offers the convenience of a bottle refill with the addition of an accessible drinking fountain that conforms to ADA guidelines.

The Yukon

MODEL: 350050

43.9" L x 11.5" W x 62.9" H

The ultimate hydration solution offering a bottle filling station, an accessible drinking fountain and a dog basin to ensure all visitors have access to fresh water.

Features & Benefits

- ▶ Rugged, dent-resistant housings and basins are constructed from 11 Ga. (.12"/3.2mm thick) stainless steel
- ▶ Housing is coated with an attractive and durable electrostatically applied polyester powder finish
- ▶ Classic monolithic design is aesthetically suited for any environment and offers beveled edges for safety
- ▶ Accessible models conform to ADA guidelines
- ▶ Dog basin design prevents accumulation of standing water to ensure your pets are only drinking fresh, uncontaminated water
- ▶ Models with dog basin include convenient "human-height" activation control
- ▶ Simple installation with quick connect water supply, slip fit drain lines and discrete access hatches for easy servicing
- ▶ Heavy duty brass bubblers are chrome plated with built-in water volume regulation and activation buttons that will not jam
- ▶ Polyethylene water feed lines are FDA compliant and conform to ASTM
- ▶ Heavy duty 1.5" PVC drain lines conform to ASTM
- ▶ Master shut-off valve included to simplify winterization and servicing
